

Company Profile

Altius Link is a joint venture between KDDI and MITSUI & Co.

Altius Link: Aiming for Heights with Digital BPO, toward a Trusted Partner

Since its creation, Altius Link has worked to promote digital BPO in hopes of enhancing communication experiences with customers and nurturing business growth for our client companies.

As Japan's working population continues to decline, intensifying labor shortages, the emergence of generative AI has heightened expectations for better business productivity and greater potential in data utilization. Against that backdrop, corporate needs are clearly growing more complex and diverse. To take the next step in its growth process, the BPO industry will need to undergo meaningful transformation.

Altius Link is working to standardize its digital-driven services and bolster its capabilities to leverage data into better analysis proposals. Our new mission is to evolve from a conventional BPO service provider into a company that offers problem-solving platforms and strengthen companies' business-transformation (BX) initiatives through data, empowering them to accelerate management decision-making.

Our growth foundation for making that vision a reality will rest on three digital-transformation (DX) efforts. First is our Service DX, which will focus on developing "Altius ONE," our service brand that harnesses data to help client companies tackle the challenges they face. Our Operation DX, meanwhile, will involve enhancing our service quality and optimizing service costs. The third component is our Corporate DX, a drive to make ourselves operate as efficiently as possible. By propelling these three initiatives forward, we will elevate our corporate value. We will also utilize the technologies, networks, and global industrial expertise of the KDDI and Mitsui & Co. group, uniting all three companies' strengths into team-driven solutions that will help us expand our BPO throughout Japan and across the globe.

The Altius Link purpose, "Forging Stronger Connections, Crafting Beautiful Experiences," articulates our core values: using the power of humans and technology to strengthen connections between people and people, people and businesses, and people and society—and make those connections more resilient, more fulfilling and reliable, and more exciting, too.

With every one of our employees embracing strong connections with customers, we at Altius Link are determined to combine high value-added services with a human touch and technologies on the cutting edge in pursuit of higher aims: co-creating value for a better society with our client companies and playing a beneficial role in bringing a sustainable society to fuller fruition.

Hajime Wakatsuki
President & CEO
Altius Link, Inc.

Organization chart

List of Services

Digital BPO Services

Contact Center & BPO Services

● Altius ONE®

Through digitization and the strategic use of resulting data resources, Altius ONE® helps customers enhance touchpoints in the purchasing process, optimize back-office operations, and tackle other business challenges across the board—from marketing to customer service.

- Altius ONE for Support
- Altius ONE Data Platform

● Contact Centers

Offering high-quality customer support based on our proven on-site capabilities cultivated over the years of experience and broad customer base. This is made possible by enhancing and linking customer contact channels, adopting new technologies, and boosting our global platform.

- Customer support
- Technical support
- In-house help desk
- IT support desk
- Home-based contact centers
- Emergency contact centers (for recalls, etc.)
- Multi-lingual contact center
- Video support services
- BCP digital package services
- Outbound calls
- Research services
- Inside sales

● Back-office Operations

Total coordination including visualization, standardization, and automation of business processes as well as optimal user flow design and channel building to increase usability. Next-generation back-office operations incorporate DX to boost quality and efficiency and facilitate more rapid decision-making.

- Back-office services (general administration)
- Corporate shared services
- eKYC services (online identity verification)
- Recruiting agency services
- Document management services
- Paperless Solutions
- Home-based back-office services
- BPA & RPA services
- Field services
- Photography and video creation services

● Consulting & Analytics

Offering process automation and optimization based on our decades of experience. We create CX by implementing assessments and consulting services that reflect customer feedback.

- Call reason analysis service
- Customer support standardization diagnostics
- Customer center quality assessment
- AI chatbot quality assessment
- FAQ knowledge assessment
- Business process visualization services
- Business process automation assessment
- Support site UI/UX assessment

● Omnichannel

Visualizing customer needs and pain points. Designing channels and customer flows that offer an effortless experience and suggesting optimal solutions to resolve issues faced by client companies.

- Visual IVR
- AI chatbots
- Interactive voice response services
- SMS service
- Proactive support
- Human Chat
- Work from home-Human Chat
- Omnichannel diagnosis service
- Self solve pack
- FAQ video services
- Personalized video services

List of Services

IT Solutions

● Engineer Dispatch

Our engineers have experience in a variety of fields including IT infrastructure, security system design, creation, and operation, as well as system development and creation. Engineers can be dispatched directly to client companies, or they can take on outsourced tasks to support the IT strategies of client companies.

- IT infrastructure design, creation and operation
- System development and creation
- Security system design, creation, and operation

● IT Outsourcing

We offer services to maintain reliable operations based on our extensive experience in the industry including troubleshooting help desk services for cloud-based services, operation and maintenance of corporate telecommunications services, operation of in-house systems, and system resource monitoring.

- IT infrastructure operation and monitoring
- System operation and monitoring
- Security system operation and monitoring
- IT help desk operations

● System Integration

We offer rapid and flexible solutions to a range of business issues by providing optimal IT infrastructure in keeping with the IT strategy of each client company and building robust security systems to respond to any environment.

- Network security
- Servers and cloud-based services

Overseas Contact Centers & BPO Services
